GETS LIFE AS SP

Said to Have Passed Atom Secrets to the West

> By DAVID BINDER Special to The New York Times

BERLIN, March 4-The East German press agency A.D.N. confirmed today that a major spy had been tried sentenced to life imprisonment, probably for revealing atomic secrets to the West.

It named the defendant in the secret trial, which ended Saturday, as a "Dr. Frucht" and identified him as former director of the Institute for Work Physiology in East Berlin. Informed sources said the case involved Prof. Adolf Henning Frucht, previously an associate of the East German atomic research center at Rossendorf, near Dresden, and also a research worker at the Soviet atomic center in Dubna.

Ironically, Dr. Frucht was a subordinate of another famous atom spy, Klaus Fuchs, at Rossendorf. Professor Fuchs, who is 55 years old, was exposed as a Soviet agent in 1950 at the British atomic center of Harwell and sentenced to 14 years in prison. He was deported to East Germany in 1959 and soon afterward took up duties as the deputy director of the Rossendorf center.

The sources said that Dr. Frucht had specialized in atomic warfare techniques and that he was considered knowledgeable on the atomic arma-Continued on Page 14, Column 6
